

The Investment Objective of the Punjab General Provident Fund (PGPF) is to generate revenue to discharge the General Provident Fund liabilities of the Government of Punjab.

Performance Review

The Fund's assets grew by 24.3% during 11M FY 2024-25. The Government has capitalized the fund with Rs 2.5 billion during the year.

Fixed Income: During the period under review, the Fund's Fixed-Income portfolio, which constitutes around 85% of the Fund, posted an annualized return of 20.3%. The Fund has a good mix of floating-rate and fixed-rate instruments. The floating-rate instruments provide a reasonable spread over the benchmark rates, and the fixed-rate instruments will not only provide a hedge against declining interest rate scenarios but also generate capital gains, thereby enhancing the overall portfolio performance.

Equity: The equity portfolio, which constitutes approximately 15% of the Fund, posted a holding-period return of 56.8% compared to a market return (KSE 100 index) of 52.6%.

The Fund received Rs 2.5 billion in capitalization during the month. The Fund is well-positioned to outperform its FY 2024-25 benchmark as it has built an excellent mix of fixed-rate and floating-rate portfolios. Going forward, the OIC shall increase the exposure in the fixed-rate portfolio and diversify the equity portfolio.
