

Dated: 13 May 2011

MONTHLY REVIEW OF INVESTMENTS April 2011

FUND SIZE

• A summary of changes in fund size during the current financial year is given in the following table:

Rs. millions (rounded to the nearest million)

| | Jul-Apr 2011 |
|--|--------------|
| Beginning fund size | 12,097 |
| Add: contribution during the period | |
| Less: transfer to Reserve Pension Fund | - |
| Add: gain/(loss) during the period | 1,338 |
| Less: expenses during the period | (14) |
| Ending fund size | 13,421 |

The numbers exclude unrealized capital gains/losses

FUND'S PORTFOLIO

• The Fund's exposures to different investment types are summarized as under:

Amounts: Rs. millions (rounded to the nearest million)

%: as percentage of Total Fund Size

| | 30 Jun | 2010 | 31 Dec | 2010 | 30 Apr 2011 | | |
|--------------------------|--------|-------|--------|-------|-------------|-------|--|
| | Amount | % | Amount | % | Amount | % | |
| PIBs | 5,737 | 47.4 | 5,789 | 45.0 | 5,700 | 42.5 | |
| T-Bills | 3,145 | 26.0 | 595 | 4.7 | 3,838 | 28.6 | |
| Short term bank deposits | 3,015 | 24.9 | 6,000 | 46.6 | 2,531 | 18.9 | |
| Corporate bonds/TFCs | 176 | 1.5 | 349 | 2.7 | 345 | 2.6 | |
| Cash at bank | 21 | 0.2 | 130 | 1.0 | 1,002 | 7.5 | |
| Other assets* | 3 | 0.0 | 1 | 0.0 | 5 | 0.0 | |
| Total Fund Size | 12,097 | 100.0 | 12,864 | 100.0 | 13,421 | 100.0 | |

*Other assets include prepaid expenses for management of PPF and book value of fixed assets (vehicles, computers etc.) of PPF

PPF has been switching exposure between T-bills & short-term bank placements in pursuit of higher rates of return.

Mya.

FUND'S PERFORMANCE

• Time Weighted Return (TWR) earned by PPF is summarized as under:

| Period | Annualized Retur | rn for the period | | Long-term Benchmark |
|--------------|------------------|-------------------|---------------|------------------------|
| | Gross Return | Net Return* | CPI Inflation | CPI Inflation + 3% |
| FY 2008-09 | 15.21% | 15.00% | 13.14% | 16.14% |
| FY 2009-10 | 13.79% | 13.61% | 12.69% | 15.69% |
| Jul-Apr 2011 | 13.43% | 13.28% | | |
| April 2011 | 13.86% | 13.72% | | |

^{*}Net Return means the return after deducting expenses incurred on management of PPF

• Inflation rates over the last 2-3 years have been much higher than our long-term inflation expectations of 9%-10% p.a. Current interest rates are also higher than our long-term expectations. We consider this an opportunity to invest in long-term fixed rate instruments. As inflation and interest rates decline and revert to their long-term averages, the strategy to invest at fixed rates will pay off and the Fund will be able to earn an attractive real rate of return in accordance with its long-term objective.

GROWTH IN ASSETS vs. LIABILITIES AND FUNDING RATIO

- We have constructed a liability index on the basis of next 30-year pension-related cash outflows as projected by the Actuary of the Fund. The index captures the growth in market value of the liabilities i.e. the present value of next 30-year liabilities computed at market rates of interest.
- The following table summarizes the amount & growth of Fund's assets vis-à-vis the amount & growth in 30-year Pension liabilities of GoPb:

| | During the | e period | End of period | | | | | |
|--------------------------------|---------------|--------------------|-------------------|----------------------------------|---------|--|--|--|
| Period | Grow | /th | Market Value | Funding Ratio | | | | |
| | Fund's Assets | Liability Index | Fund's Assets (a) | 30-yr Pension Liabilities (b) | (a)/(b) | | | |
| FY 2008-09 | 15.00% | 28.01% | 3.5 | 575.9 | 0.60% | | | |
| FY 2009-10 | 13.21% | 9.41% | 12.1 | 621.7 | 1.94% | | | |
| Jul 2010 - Apr 2011 | 7.87% | -6.83% | 13.0 | 579.2 | 2.25% | | | |
| Jul 2008 - Apr 2011 (CAGR)* | 12.74% | 9.85% | | | | | | |

*CAGR means Compound Annualized Growth Rate

1. September 1

en f

- Since the pension liabilities have very long maturities, their present value is highly sensitive to changes in interest rates.
- The present value of liabilities has a negative correlation with interest rates it increases sharply when interest rates decrease and vice versa.
- During FY 2008-09, interest rates for all maturities declined. Liability index grew by 28% during that period. The present value of liabilities increased sharply as the future liabilities were discounted at a lower rate.
- During FY 2009-10, interest rates increased for shorter maturities but declined for longer maturities. Liability index grew by a modest 9.41% during that period.
- During the current year i.e. FY 2010-11, interest rates for all maturities have increased.
 Liability index declined by 6.83% during this period. The present value of liabilities declined sharply as the future liabilities were discounted at a higher rate.
- The above analysis highlights that the biggest risk exposure of the pension liabilities is a decline in interest rates. It can sharply increase the requirement of funds to meet the same liabilities and thus lower the Funding Ratio of the pension plan.
- The focus of the investment strategy of PPF should therefore be on managing the interest rate risk.

REVIEW OF IMPORTANT ECONOMIC & FINANCIAL VARIABLES GDP GROWTH

- Although the government has not officially announced the provisional estimates of GDP growth during FY 2010-11, newspaper reports indicate that National Accounts Committee has approved the GDP growth estimate for FY 2010-11 at 2.4%. This is lower than the revised estimate of 2.8% GDP growth for the current financial year (the original target of 4.5% GDP growth was revised downwards in the aftermath of the devastating floods). As per provisional estimates reported in newspapers:
 - Services sector has performed better compared with agriculture & industry.
 Services sector is estimated to grow by 4.1% during the current financial year against the growth target of 4.7%.
 - Agriculture sector is estimated to grow at 1.2% against a growth target of 3.8%.
 Within the agriculture sector, livestock and minor crops subsectors have performed better relative to the major crops subsector.
 - Industry sector is estimated to post zero growth during the current financial year.
- As per newspaper reports, the National Accounts Committee has also revised downwards the GDP growth estimates for FY 2009-10 from 4.1% to 3.8%.

| Revenue balance (1-2a) | (148.7) | (237.2) | | | (1.0) | (1.4) | 59.5 |

¹Revenue surplus/(deficit) = Total revenue - Current expenditure

Source: Ministry of Finance

- Most of the components of the budget worsened during the first half of the current fiscal year.
 - o Tax as well as non-tax revenues fell as a percentage of GDP;
 - Development expenditure faced a major decline. It fell by 35.7% compared with the same period of last year. As a percentage of GDP, it fell from 1.5% of GDP last year to just 0.8% of GDP this year. This has adverse consequences for longterm growth potential of the economy;

1 Stephen

- Overall budget deficit increased to 2.9% of GDP;
- Revenue deficit increased to Rs. 237.2 bn or 1.4% of GDP showing a deteriorating capacity to meet even the current expenditures.
- Fiscal deficit reached Rs. 490 bn in first half out of which Rs. 286 bn was finenced from domestic bank borrowing which increased by 167% over this period.
- High fiscal deficit combined with heavy borrowing is contributing to high inflation, high interest rates and crowding out of the private sector.
- As per newspaper reports, the federal budget is likely to be presented before the parliament by the end of May 2011. It is expected that the overall revenue target will be set in the range of Rs. 1,950 million for FY 2011-12.

DEBT

Total Debt:

• Total debt of Pakistan is summarized in the following table:

| | Amount (USD bn) | | Amount (Rs. bn) | | As % o | Growth¹ (%) | |
|-------------------------|-----------------|--------|-----------------|--------|---------|-------------|------------|
| | June-10 | Dec-10 | June-10 | Dec-10 | June-10 | Dec-10 | Jul-Dec 10 |
| Domestic Debt | 54.4 | 61.8 | 4,653 | 5,295 | 31.7 | 30.8 | 13.8 |
| External Debt | 55.9 | 58.4 | 4,783 | 5,001 | 32.6 | 29.1 | 4.6 |
| Total Debt | | | 9,435 | 10,295 | 64.3 | 59.9 | 9.1 |
| Exchange Rate (Rs./USD) | | | 85.56 | 85.64 | | | |
| GDP | | | 14,668 | 17,182 | | | |

Domestic Debt:

• The domestic debt profile of Pakistan is summarized in the following table:

| Domestic Debt | Amount | (Rs. bn) | As % of Total Dom. Debt | | As % of GDP | | Growth (%) | |
|---------------------|--------|----------|----------------------------|--------|-------------|--------|------------|--|
| | Jun-10 | Dec-10 | Jun-10 | Dec-10 | Jun-10 | Dec-10 | FY 11 | |

| Saving Schemes | 1350 | 1416 | 29.0 | 26.7 | 9.2 | 8.2 | 4.9 | |
| IV) FC Instruments | 3 | 2 | 0.1 | 0.0 | 0.0 | 0.0 | (48.4) | |
| Total Domestic Debt | 4,653 | 5,295 | 100.0 | 100.0 | 31.7 | 30.8 | 13.8 | |
| GDP | 14,668 | 17,182 | | | | | | |

Source: SBP

- The government's dependence on short-term borrowing is quite high and has increased further during the current financial year. Floating debt, which consists of T-bills having maturities of 3, 6 and 12 months, constituted 54% of the total domestic debt at the end of Dec 2010.
- The result is that the Government has to roll over its debt after very short intervals. This, combined with the fresh borrowing needs of the Government, is putting further upward pressure on interest rates.

External Debt:

• The external debt profile of Pakistan is summarized in the following table:

| External Debt | Amoun billi | | Amount (Rs. billion) | | As % (| of GDP | Growth¹ (%) | |
|------------------------------|----------------|--------|----------------------|--------|---------|--------|----------------|--|
| | June-10 | Dec-10 | June-10 | Dec-10 | June-10 | Dec-10 | Jul-Dec10 | |

| 7) Pvt. Non-Guaranteed Bonds | 0.1 | 0.1 | 11 | 11 | 0.1 | 0.1 | (0.1) | |
| Total External Debt | 55.9 | 58.4 | 4,783 | 5,001 | 32.6 | 29.1 | 4.6 | |
| Exchange Rate (Rs./USD) | | | 85.56 | 85.64 | | | | |
| GDP | | | 14,668 | 17,182 | | | | |

¹Growth in rupee value Source: SBP, MOF, Reuters

- · Relationship between external debt and exchange rate is a tricky one.
 - Depreciation of exchange rate leads to higher debt servicing cost (in terms of domestic currency) on external debt.
 - Repayment of external debt, especially in the backdrop of a weak external account position, can cause depreciation of the exchange rate.

Samuel account to

EXTERNAL ACCOUNT

Balance of payments is summarized in the following table:Billion US \$

| | Jul-Mar | 2011 | |
|-----------------------------|---------|-------|-----------|
| | FY 10 | FY 11 | Growth* % |
| Current Account | (3.1) | 0.1 | 103 |
| Capital Account | 0.2 | 0.1 | (34) |
| Financial Account | 2.9 | 1.5 | (49) |
| Errors and Omissions | 0.5 | 0.1 | (78) |
| Overall Balance of Payments | 0.5 | 1.8 | 270 |

Source: SBP

*Growth is positive where an account has shown improvement e.g. deficit has decreased or surplus has increased. Growth is negative where an account has worsened e.g. deficit has increased or surplus has decreased.

CURRENT ACCOUNT

Detailed position of Current Account is given in the following table:
 Billion US \$

| | Jul-N | 1ar 11 | |
|--|--------|--------|----------|
| | FY 10 | FY 11 | Growth % |
| Current Account (1+2+3) | (3.1) | 0.1 | 103 |
| (1) Balance of trade in Goods & Services | (10.1) | (9.2) | 9 |
| Goods: Exports f.o.b | 14.3 | 17.9 | 25 |
| Goods: Imports f.o.b | 22.5 | 26.0 | 15 |
| Balance of trade in goods | (8.2) | (8.0) | 2 |
| Services: Credit (exports) | 3.1 | 4.2 | 35 |
| Services: Debit (imports) | 5.1 | 5.4 | 8 |
| Balance of trade in services | (1.9) | (1.2) | 37 |
| (2) Balance of Income Transfers | (2.3) | (2.2) | 5 |
| Income: Credit (inflows) | 0.4 | 0.5 | 15 |
| Income: Debit (outflows) | 2.7 | 2.7 | (2) |
| Interest Payments | 1.1 | 1.1 | (1) |
| Profit & Dividend | 0.4 | 0.4 | (3) |
| (3) Balance of Current Transfers | 9.3 | 11.5 | 24 |
| Current Transfers: Credit (inflows) | 9.4 | 11.6 | 23 |
| Workers' Remittances | 6.6 | 8.0 | 22 |
| FCA Residents | 0.5 | 0.3 | (42) |
| Current Transfers : Debit (outflows) | 0.1 | 0.1 | (26) |

Source: SBP

Lus.

- The Current Account has shown remarkable improvement compared with the same period of last year.
 - Deficit on trade in goods & services is lower than the same period of last year.
 Exports of goods as well as services have grown faster than imports.
 - Workers' remittances have also shown a healthy growth over the same period of last year.
- Although Current Account has recorded a small surplus during Jul-Mar FY11, the underlying fundamentals are weak and suggest that a surplus is unlikely to sustain.
 - The increase in exports is attributable more to higher prices and less to higher volumes. Higher cotton prices have immensely helped the export performance. A moderation of cotton prices in future will adversely affect the export figures.
 - o Imports are expected to grow faster in the near future because of rising international commodity prices, especially oil.

FINANCIAL ACCOUNT

• Composition of the Financial Account during the current financial year and its comparison with the same period of last financial year is shown in the following table:

Billion US \$

| | Jul-M | lar 11 | |
|---------------------------|-------|--------|----------|
| | FY 10 | FY 11 | Growth % |
| Financial Account (1+2+3) | 2.9 | 1.5 | (49) |
| (1) Direct Investment | 1.4 | 1.1 | (26) |
| (2) Portfolio Investment | (0.2) | 0.2 | 221 |
| (2a) Equity | 0.4 | 0.3 | (33) |
| (2b) Debt | (0.6) | (0.1) | 89 |
| (3) Other Investment | 1.7 | 0.2 | (87) |
| Equity based flows (1+2a) | 1.9 | 1.4 | (28) |
| Debt based flows (2b+3) | 1.1 | 0.2 | (85) |

Source: SBP

• Financial Account shows a significantly weak position compared with the same period of last year. Equity as well as Debt flows have been weaker than the same period of last year. This clearly indicates a weak capacity to finance the Current Account Deficit.

112 month moving average

Source: SBP

 The breakdown of CPI inflation into its various components is shown in the following table:

| Index | Weightage % in CPI | Mar 201 | ation (%) | |
|---|-----------------------|---------|-----------|-------|
| | | YOY | MOM | 12mma |
| CPI | 100 | 13.2 | 1.5 | 13.9 |
| CPI food | 40.34 | 18.0 | 2.0 | 17.6 |
| Non-perishable food items | 35.20 | 16.8 | 1.5 | 15.3 |
| Perishable food items | 5.14 | 26.9 | 5.6 | 32.5 |
| CPI non-food | 59.66 | 9.1 | 1.0 | 10.8 |
| Apparel, textile & footwear | 6.10 | 13.5 | 1.6 | 10.7 |
| House rent | 23.43 | 6.6 | 0.7 | 8.0 |
| Fuel & lighting | 7.29 | 9.1 | -0.02 | 17.0 |
| Household, furniture & equipment etc. | 3.29 | 11.6 | 1.2 | 8.8 |
| Transport & communication | 7.32 | 10.5 | 1.7 | 15.7 |
| Recreation & entertainment | 0.83 | 10.5 | 0.1 | 13.7 |
| Education | 3.45 | 5.1 | 0.1 | 6.7 |
| Cleaning, laundry & personal appearance | 5.88 | 13.6 | 3.1 | 10.6 |
| Medicare | 2.07 | 16.4 | 0.2 | 13.1 |

Source: SBP

 CPI inflation picked up in Mar 2011 on MOM as well as YOY basis. Major reasons responsible for the uptick in inflation during Mar 2011 include:

Passing on the impact of rising international oil prices to domestic consumers;
 and

o Upward adjustment in electricity tariffs.

Upwa

- Inflation numbers for food & non-food segments show that overall inflation is driven mainly by the food segment.
 - Food items which constitute 40.3% of CPI had a weighted contribution of 62.1% in the YOY CPI inflation.
 - o Whereas non-food items which constitute 59.7% of CPI had a weighted contribution of 37.9% in the YOY CPI inflation.
- Item wise analysis of YOY price changes shows that within the food group 72% of the items/goods exhibited double digit inflation during the month of Mar 2011. This shows that inflationary pressures are quite widespread within the food group.
- Low inflation exhibited by the House Rent Index (HRI) is the major reason behind single digit inflation in non-food group. However, it is likely that HRI will show higher inflation in the near future due to rising building material prices in international as well as domestic market.

CORE INFLATION

• A summary of measures of core inflation is given in the following table:

| | Core Inflation | | | | | | | | |
|---------------|----------------|----------|-------|------|-------------|-------|--|--|--|
| Period | | NFNE¹ (% | 5) | Т | rimmed² (%) | | | | |
| | YOY | MOM | 12mma | YOY | MOM | 12mma | | | |
| Jan-2011 | 9.4 | 0.7 | 9.9 | 12.2 | 0.9 | 12.6 | | | |
| Feb-2011 | 9.2 | 0.6 | 9.8 | 11.7 | 0.4 | 12.6 | | | |
| Mar-2011 | 9.5 | 1.0 | 9.8 | 11.9 | 1.1 | 12.7 | | | |
| 12 month min. | 9.2 | 0.4 | 9.8 | 11.7 | 0.4 | 11.2 | | | |
| 12 month max. | 10.6 | 1.7 | 11.9 | 13.6 | 1.2 | 12.7 | | | |

¹NFNE stands for non-food non-energy measure of core inflation

Source: SBP

- Year-on-year NFNE inflation has remained in single digits over the last few months indicating that inflationary pressures are concentrated in food & energy items.
- Since the trimmed mean excludes the more volatile items, it is a relatively more stable measure of inflation. 12-month moving average of trimmed mean inflation stands at 12.7% which suggests that inflationary pressures are quite persistent and it will take some time to control them.

²Trimmed Mean measure of core inflation excludes 20% of the items in the CPI basket showing extreme changes in price

WHOLESALE PRICES

A summary of inflation rates based on WPI (Wholesale Price Index) is given below:

| | WPI Inflation | | | | | | | | | |
|---------------|-----------------|------|-------|--------------|------|-------|------------------|------|-------|--|
| Period | WPI Overall (%) | | | WPI Food (%) | | | WPI Non-food (%) | | | |
| | YOY | MOM | 12mma | YOY | MOM | 12mma | YOY | MOM | 12mma | |
| Jan 2011 | 22.6 | 1.6 | 21.6 | 20.6 | 1.7 | 18.0 | 24.2 | 1.6 | 24.5 | |
| Feb 2011 | 24.4 | 1.9 | 22.0 | 19.2 | -0.6 | 18.3 | 28.6 | 3.8 | 25.0 | |
| Mar 2011 | 25.4 | 3.3 | 22.3 | 19.4 | 1.8 | 18.6 | 30.1 | 4.5 | 25.4 | |
| 12 month min. | 17.6 | -0.6 | 10.1 | 14.4 | -1.5 | 11.4 | 20.1 | -2.0 | 9.2 | |
| 12 month max. | 25.7 | 3.5 | 22.3 | 22.7 | 4.5 | 18.6 | 30.1 | 4.5 | 25.4 | |

Source: SBP

The WPI portrays an even worse picture of inflation than the CPI. Overall WPI and both
of its major components i.e. food and non-food are showing YOY inflation of more than
20%. Since wholesale prices eventually feed into consumer prices, WPI inflation is a
leading indicator of CPI inflation and indicates that the near-term outlook for CPI
inflation is not promising.

 A breakdown of WPI inflation into its various components is shown in the following table:

| Index | Weightage (%) in WPI | Mar 201 | 1 - WPI Infla | WPI Inflation (%) | | |
|-----------------------------|-------------------------|---------|---------------|-------------------|--|--|
| | | YOY | MOM | 12mma | | |
| WPI | 100 | 25.4 | 3.3 | 22.3 | | |
| WPI food | 42.1 | 19.4 | 1.8 | 18.6 | | |
| WPI non-food | 57.9 | 30.1 | 4.5 | 25.4 | | |
| Raw materials | 8.0 | 66.9 | 5.4 | 61.1 | | |
| Fuel, lighting & lubricants | 19.3 | 17.4 | 4.8 | 16.6 | | |
| Manufactures | 25.9 | 33.0 | 4.0 | 24.9 | | |
| Building materials | 4.7 | 13.0 | 1.4 | 13.0 | | |

Source: SBP

 As per the wholesale price index, non-food inflation is actually higher than food inflation. Since the WPI tracks international price trends more closely, this reflects the rising trend in prices of non-food items.

INTERNATIONAL COMMODITY PRICES

· The following table summarizes international commodity price inflation rates:

| Period | Inflation Rates as per the indices maintained by IMF | | | | | | | | | | |
|---------------|--|-------------------------------|-------|-----------|------|-------|---|------|-------|--|--|
| | | l) Index o uel Comm (%) | | Index (%) | | | Index of Non-fuel Primary Commodities (%) | | | | |
| | YOY | MOM | 12mma | YOY | MOM | 12mma | YOY | MOM | 12mma | | |
| Jan 2011 | 27.3 | 6.6 | 25.4 | 20.6 | 3.9 | 26.3 | 38.9 | 11.0 | 24.6 | | |
| Feb 2011 | 36.1 | 4.4 | 24.7 | 29.8 | 4.5 | 24.1 | 46.9 | 4.4 | 26.2 | | |
| Mar 2011 | 37.3 | 4.9 | 24.0 | 35.5 | 9.5 | 22.4 | 40.5 | -2.1 | 26.9 | | |
| 12 month high | 48.3 | 6.6 | 28.2 | 60.0 | 9.5 | 32.3 | 46.9 | 11.0 | 26.9 | | |
| 12 month low | 9.9 | -7.5 | 3,6 | 8.7 | -8.8 | 5.2 | 10.3 | -5.1 | 4.1 | | |

Source: IMF

• A breakdown of the Commodity index into its various components is given below:

| Index | Weightage (%) in Commodity Index | Mar 2011 Inflation (%) | | | |
|-----------------------------|-------------------------------------|---------------------------|------|-------|--|
| | | YOY | MOM | 12mma | |
| Fuel & Non-fuel Commodities | 100 | 37.3 | 4.9 | 24.0 | |
| Fuel Commodities (Energy) | 63.1 | 35.5 | 9.5 | 22.4 | |
| Petroleum | 53.6 | 37.5 | 11.0 | 22.4 | |
| Natural Gas | 6.9 | 6.5 | 0.0 | 15.0 | |
| Coal | 2.6 | 35.6 | -0.3 | 38.2 | |
| Non-Fuel Commodities | 36.9 | 40.5 | -2.1 | 26.9 | |
| Industrial inputs | 18.4 | 48.9 | -0.6 | 39.1 | |
| Agricultural Raw Mat. | 7.7 | 36.2 | 6.9 | 33.4 | |
| Metals | 10.7 | 56.2 | -4.0 | 42.4 | |
| Edibles | 18.5 | 32.2 | -3.6 | 17.1 | |
| Food | 16.7 | 31.7 | -4.1 | 17.3 | |
| Beverages | 1.8 | 36.0 | 0.4 | 16.9 | |

Source: IMF

- International commodity prices exhibited high YOY as well as MOM inflation during Mar 2010. MOM inflation was driven primarily by petroleum and agriculture raw materials.
 Most other commodity group exhibited little or negative inflation on MOM basis.
- The major reasons behind high inflation in international commodity prices include:
 - o Economic recovery gaining momentum in developed markets;
 - o Better than expected economic performance of emerging markets;
 - Natural calamities in Japan and political unrest in oil producing Gulf & North African region.

J. O. Marine

- It is evident that, during the current financial year, the Monetary Base (Reserve Money RM) has grown much faster than the Monetary Aggregate (Broad Money M2). The major causes of high growth in Reserve Money include
 - o growth in NFA; and
 - o government borrowing from SBP
- Since the Monetary Base is ultimately converted to Monetary Aggregate through the
 multiplier effect (repeated cycles of deposits and loans), the risk of high growth in M2
 in future has increased which, accompanied by slow growth in Real GDP, is likely to
 lead to higher inflation.
- A summary of interest rates for the last few months is given below:

| Period | Yield on 1- (% p. | | Yield on 10-yr PIB (% p.a.) | | | | 6-month (% p. | |
|----------|----------------------|-------|--------------------------------|-------|-----------|-------|------------------|--|
| | Month end | 12mma | Month end | 12mma | Month end | 12mma | | |
| Feb 2011 | 13.78 | 12.93 | 14.20 | 13.41 | 13.76 | 13.00 | | |
| Mar 2011 | 13.76 | 13.05 | 14.08 | 13.53 | 13.73 | 13.11 | | |
| Apr 2011 | 13.80 | 13.18 | 14.10 | 13.66 | 13.67 | 13.22 | | |
| 12m high | 13.84 | 13.18 | 14.25 | 13.66 | 13.83 | 13.22 | | |
| 12m low | 12.23 | 12.21 | 12.63 | 12.45 | 12.27 | 12.41 | | |

Source: SBP, Reuters

- Two major reasons behind the persistence in high interest rates include high inflation and high budget deficit & borrowing by the government.
- Continued spending by the government in excess of its resources is pushing up aggregate demand despite a tight monetary policy and slowdown in private sector spending. Supply constraints due to energy shortages and scarcity of credit are preventing a similar growth in aggregate supply. The demand-supply gap is leading to intensification of inflationary pressures.
- The most crucial adjustment that the economy needs is a lowering of budget deficit
 and borrowing by the government. This will narrow the demand-supply gap, lower the
 inflationary pressures and pave the way for lower interest rates and revival of credit
 flow to the private sector.
- We expect that SBP will maintain the discount rate at 14% in next monetary policy announcement due by the end of this month. Our expectation is based on the following reasons:
 - YOY CPI inflation has declined from 15.5% in December 2010 to 13.2% in March 2011.

John Market

- A reduction in stock of government borrowing from SBP has led SBP to express confidence that government will adhere to mutually agreed borrowing limits from SBP thus controlling a major source of inflationary pressures.
- The external account is performing better than expectations. SBP does not visualize any immediate risks to the Current Account Balance. The overall Balance of Payments position is healthy with a gradual build-up of foreign exchange reserves and a stable foreign exchange market.

INVESTMENT STRATEGY

- Our long-term inflation expectation for the future is in the range of 9-10% p.a. a fixed rate of return of 12.5% p.a. or above on the investments is consistent with PPF's long-term return objective of 'inflation + 3%'.
- The current inflation rate is too high and will gradually revert to its long-term average.
 Since above-average inflation has led to above-average interest rates also, this is an opportunity to invest at fixed rates of return for longer periods.
- Considering the attractive yields on a few highly rated TFCs, the ISC may consider increasing the allocation to corporate bonds/TFCs which currently stands a maximum of 5% of Fund size.
- A major limitation of investments in floating-rate TFCs is that their yields are vulnerable to a decline in interest rates. In order to manage the interest rate risk underlying the floating-rate investments, the ISC will consider entering into fixed-forfloating Interest Rate Swaps so that PPF can convert its floating-rate investments into fixed-rate investments.
- The ISC is yet to make a decision on our recommendation to allocate 10% of Fund size to equity investments. This will also be discussed in the next ISC meeting.
- There has been no breakthrough in negotiations with commercial banks for long term placement of funds. The banks are generally reluctant to offer term deposits for periods longer than one year. The ISC may consider revising the asset allocation and reallocating this portion to other avenues such as corporate bonds/TFCs, T-bills, Short-term TDRs, PIBs, Saving Schemes or Stocks etc.
